

## Ecology Technician

Ryder Environmental (formerly the environmental division of Ryder Consulting) is one of New Zealand's leading environmental consultancies. We are based in Dunedin and offer a range of specialist services including freshwater, marine, and terrestrial ecology.

We have a vacancy for an **Ecology Technician** to assist with freshwater ecology laboratory and field work. The position is full-time although applicants seeking a part-time position will be considered.

The successful applicant will be involved with:

- processing freshwater macroinvertebrate and algae samples
- assisting in ecological field work
- data entry and analysis, and report preparation
- contributing to maintaining laboratory equipment
- other tasks as necessary

The successful applicant will have:

- experience in freshwater macroinvertebrate and/or algae identification
- time management and organisational skills
- computer skills
- a current full driver's license
- a high level of physical fitness
- enthusiasm to learn new skills and work with a small group of specialists

The position is ideal for applicants with an MSc or postgraduate diploma in zoology, ecology or environmental science. While experience is desirable, training is available and encouraged. Scope exists to broaden the range of work opportunities depending on ability.

The position is based in our Dunedin office. Remuneration is dependent on skills and experience.

For confidential enquiries about this position you can contact Ben Ludgate on his landline (03) 477 2119 ext 6, mobile phone 021 177 4291, or via email [b.ludgate@ryderconsulting.co.nz](mailto:b.ludgate@ryderconsulting.co.nz).

Please have your applications (consisting of a covering letter, curriculum vitae and names of 2 referees) to Ben by Monday the 13th of November 2017.
